Jr. UX Designer with a lifelong passion for human psychology, design, and ongoing innovation to improve everyday experiences. I am a problem solver with a strong love of learning. I am passionate about providing beautiful, functional user experiences and solutions.

## TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Node.js, React, Material UI, Bootstrap, Figma, Adobe XD, Research Skills.

## PROJECTS

### Board@Work

Git: <https://github.com/bmcleod12/board-at-work>

Deployed: <https://project-2-group-3.herokuapp.com/>

- Our team wanted to create a simple way for remote workers to stay in touch with important workplace updates during COVID lockdowns.
- I was responsible for the design and layout of this project, and coded most of the front end of this website.
- Primarily used Mockflow, Ninjamock, HTML, custom CSS, photo editing software, Javascript and Git.

### JD's BarBQ Business Logo

<https://github.com/KenzieAlyce/portfolio/blob/main/JDsbbq.jpg>

- JD's BarBQ needed a logo for their business which captured the friendly and welcoming atmosphere of their family business
- I created this logo using charcoal pencils and paint.
- I later scanned this image and used digital tools to edit and touch it up.

### Food for Comfort

Git: <https://github.com/sfinck/food-search-gp>

Deployed: <https://sfinck.github.io/food-search-gp/>

Design: <https://github.com/KenzieAlyce/portfolio/blob/main/FoodForComfortDesign.png>

- Our team hoped to create a simple platform for users to find food local to them. We included the weather results as a helpful planning tool.
- I collaborated with a team to create the concept, and coded much of the front end.
- I designed the original look of the front end, which we tweaked to create the final look.

## EXPERIENCE
